SUMMARY

I am Full Stack Web Developer specializing in the MERN stack. Experienced in building and deploying multiple web applications. Passionate about developing full-stack projects that solve real-world problems. Currently expanding skills by learning AI alongside project work.

WORK EXPERIENCE

Full Stack web developer , online learning platform

Mar 2025 - Aug 2025

- Built a MERN stack e-learning platform with admin, client, and server modules.
- Created a secure admin panel for course and module management.
- Designed a client app with login, course browsing, and learning flow.
- Solved manual management with centralized admin control.
- Delivered a scalable, accessible solution for Afronex Tech Hub.

Full Stack web developer , Hospital Appointment website

Set 2023 - Mar 2023

- Built a MERN stack hospital appointment system with client, admin, and server modules.
- Designed a client portal where patients can view doctors and book appointments by date/time.
- Created an admin panel to manage doctors, schedules, and appointments.
- Solved long waiting times by enabling online booking and management.
- Delivered a time-saving solution that improves efficiency for patients and staff.

Other small projects include a Hotel Management System and building portfolios for various professionals.

EDUCATION

Bachelor of Science in Computer Science

2021- 2025 (Expected/Completed)

Haramaya University

- Studied both hardware and software fundamentals during my Computer Science degree.
- Gained basic knowledge in hardware, with a stronger focus on software and web development.
- Learned through university courses, online platforms, and hands-on projects.
- Currently taking a paid Social Media Marketing Agency course at Khilex Academy.
